## SAFETY DATA SHEET

#### 1. Identification Soak-N-Solv (4162-77) **Product identifier** Other means of identification Not available. **Recommended use HVACR** Component Restoring Solution **Recommended restrictions** None known Manufacturer/Importer/Supplier/Distributor information Manufacturer Company name Nu-Calgon Address 2611 Schuetz Road St. Louis, MO 63043 United States Telephone 314-469-7000 / 800-554-5499 Not available. E-mail 1-800-424-9300 (CHEMTREC) **Emergency phone number** See above. Supplier 2. Hazard identification Flammable liquids Category 2 **Physical hazards** Not classified. Health hazards Not classified. **Environmental hazards** WHMIS 2015 defined hazards Not classified Label elements Signal word Danger Hazard statement Highly flammable liquid and vapor. **Precautionary statement** Prevention Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Keep container tightly closed. Ground and bond container and receiving equipment. Use explosion-proof electrical, ventilating and lighting equipment. Use non-sparking tools. Take action to prevent static discharges. Wear protective gloves, protective clothing, eye protection and face protection. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or Response shower. In case of fire: Use appropriate media to extinguish. Storage Store in a well-ventilated place. Keep cool. Dispose of container in accordance with local, regional, national and international regulations. Disposal WHMIS 2015: Health Hazard(s) None known not otherwise classified (HHNOC) WHMIS 2015: Physical None known Hazard(s) not otherwise classified (PHNOC) Hazard(s) not otherwise None known. classified (HNOC) Supplemental information None. 3. Composition/Information on ingredients Mixture

Chemical name	Common name and synonyms	CAS number	%
Acetone		67-64-1	3-7*
Methylal		109-87-5	80-100*

All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

#### **Composition comments**

US GHS: The exact percentage (concentration) of composition has been withheld as a trade secret in accordance with paragraph (i) of §1910.1200.

\*CANADA GHS: The exact percentage (concentration) of composition has been withheld as a trade secret.

	4. First-aid measures
Inhalation	If symptoms develop move victim to fresh air. If symptoms persist, obtain medical attention.
Skin contact	IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower.
Eye contact	Flush with cool water. Remove contact lenses, if applicable, and continue flushing. Obtain medical attention if irritation persists.
Ingestion	Rinse mouth. Do not induce vomiting. If vomiting occurs naturally, have victim lean forward to reduce risk of aspiration. Never give anything by mouth if victim is unconscious or is convulsing. Obtain medical attention.
Most important symptoms/effects, acute and delayed	Direct contact with eyes may cause temporary irritation.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically.
General information	Take off all contaminated clothing immediately. If you feel unwell, seek medical advice (show the label where possible). Show this safety data sheet to the doctor in attendance. Wash contaminated clothing before reuse. Avoid contact with eyes and skin. Keep out of reach of children.
	5. Fire-fighting measures
Suitable extinguishing media	Alcohol resistant foam. Dry chemical powder. Carbon dioxide.
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	Vapors may form explosive mixtures with air. Vapors may travel considerable distance to a source of ignition and flash back. During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire-fighting equipment/instructions	In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	Highly flammable liquid and vapor.
Hazardous combustion products	May include and are not limited to: Oxides of carbon.
	6. Accidental release measures
Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For persona protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Keep combustibles (wood, paper, oil, etc.) away from spilled material. Take precautionary measures against static discharge. Use only non-sparking tools. This product is miscible in water.
	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Following product recovery, flush area with water.
	Small Spills: Absorb with earth, sand or other non-combustible material and transfer to containers for later disposal. Clean surface thoroughly to remove residual contamination.
Environmental precautions	Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS. Avoid discharge into drains, water courses or onto the ground. Do not discharge into lakes, streams, ponds or public waters.

Precautions for safe handlingDo not handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. Avoid contact with eyes, skin and clothing. When using do not smoke. Explosion-proof general and local exhaust ventilation. Take precautionary measures against static discharges. All equipment used when handling the product must be grounded. Use non-sparking tools and explosion-proof equipment. Avoid prolonged exposure. Wear appropriate personal protective equipment. Wash thoroughly after handling. Use good industrial hygiene practices in handling this material. When using do not eat or drink.Conditions for safe storage, including any incompatibilitiesKeep away from heat, sparks and open flame. Prevent electrostatic charge build-up by using common bonding and grounding techniques. Store in a cool, dry place out of direct sunlight. Store in tightly closed container. Store in a well-ventilated place. Keep in an area equipped with sprinklers. Store away from incompatible materials (see Section 10 of the SDS). Keep out of reach of children.	7. Handling and storage			
including any incompatibilities common bonding and grounding techniques. Store in a cool, dry place out of direct sunlight. Store in tightly closed container. Store in a well-ventilated place. Other information				
Explosive properties	Not explosive.			
Oxidizing properties	Not oxidizing.			
	10. Stability and rea	activity		
Reactivity	This product may react with strong oxid	izing agents.		
Possibility of hazardous reactions	No dangerous reaction known under co	nditions of normal use.		
Chemical stability	Material is stable under normal conditio	ns.		
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Do not mix with other chemicals.			
Incompatible materials	Acids. Strong oxidizing agents.			
Hazardous decomposition products	May include and are not limited to: Oxid	es of carbon.		
	11. Toxicological info	ormation		
Routes of exposure	Eye, Skin contact, Inhalation, Ingestion.			
nformation on likely routes of e	xposure			
Ingestion	May cause stomach distress, nausea or	vomiting.		
Inhalation	Prolonged inhalation may be harmful.			
Skin contact	No adverse effects due to skin contact a	are expected.		
Eye contact	Direct contact with eyes may cause terr	porary irritation.		
Symptoms related to the physical, chemical and toxicological characteristics	Direct contact with eyes may cause terr	porary irritation.		
Information on toxicological effe	ects

Specific target organ toxicity - single exposure	Not classified.	
Specific target organ toxicity - repeated exposure	Not classified.	
Aspiration hazard	Not an aspiration hazard.	
Chronic effects	Prolonged inhalation may be ha	armful.
	12. Ecologica	I information

Ecotoxicity	See below		
Ecotoxicological data Components		Species	Test Results
Acetone (CAS 67-64-1)			
Crustacea	EC50	Daphnia	13999 mg/L, 48 Hours
Aquatic			
Crustacea	EC50	Water flea (Daphnia magna)	10294 - 17704 mg/L, 48 hours
Fish	LC50	Rainbow trout,donaldson trout (Oncorhynchus mykiss)	4740 - 6330 mg/L, 96 hours
Methylal (CAS 109-87-5)			
Aquatic			
Fish	LC50	Fathead minnow (Pimephales promela	s) 6261 - 7801 mg/L, 96 hours
Persistence and degradability	No data is available on the degradability of any ingredients in the mixture.		
Bioaccumulative potential			
Mobility in soil	No data available.		
Mobility in general	Not available.		
Other adverse effects	No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.		
		13. Disposal considerations	
Disposal instructions	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.		
Local disposal regulations		ccordance with all applicable regulations.	-

Hazardous waste code	The waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Waste from residues / unused products	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.
	14. Transport information
Transport of Dangerous Goods	Classification Method: Classified as per Part 2, Sections 2.1 – 2.8 of the Transportation of
(TDG) Proof of Classification	Dangerous Goods Regulations. If applicable, the technical name and the classification of the product will appear below.
J.S. Department of Transportation	
Basic shipping requirements
