

AIRFLOW TROUBLESHOOTING CLASS

HANDS-ON TRAINING

WHAT TO EXPECT

RSD is hosting an airflow troubleshooting class. We will discuss the unit airflow diagnosis and perform hands-on airflow measurements using industry standard tools used to measure air movement in a ducted system. Technicians will walk away with a better understanding on how to measure static pressure, cfm and knowledge on how to use the tools to take the measurements correctly and use the information in your diagnosis.

CLASS DETAILS

DATE: Thursday, October 31st 2024
