

Pressure Independent Valves

End User & Technician Training

RSD is hosting a Belimo Pressure Independent Systems and Valves technical training. Here you will learn about two types of PI valves, Mechanical and Electronic. This will go over how smart valves optimize performance by addressing “Low-Delta T” syndrome, make remote/continuous commissioning possible, and provide on-board trending for operational analysis. The course will discuss the difference between PI and PD valves. It will also offer a better understanding of what (POE) Power Over Ethernet is and what a “Coil Curve” can tell about coil performance.

- Thursday, March 27th, 2025
- 5:00pm to 7:00pm at Beeb's Sports Bar & Grill
- 915 Clubhouse Dr., Livermore, CA 94551
- Presented by Ken Duncan of Belimo
- This is a free event
- Snacks will be provided
