

Belimo 101

Valves and Actuators

RSD is hosting a 101 class on Belimo valves and actuators. This will give a better understanding of control types and which applications to use. Here you will learn about basic troubleshooting, select control signals, mount and wire both fail safe and non-fail safe actuators, sizing based on damper torque requirements, and the difference between fail safe and non-fail safe actuators. You will also learn the key differences on 2, 3, & 6-way valves, how to size a damper, and how to mount and wire spring and non-spring return actuators.

SPACE IS LIMITED!

REGISTER: [contact the branch and register with the information provided below](#)

- Thursday, March 27th, 2025
- 8:00am to 10:00am at the Tucson training center
- 2055 E 19th St., Tucson, AZ
- Presented by Daniel Brown of Belimo
- Continental breakfast will be provided
- Cost: \$20 per person / No refunds for absentees
