

AIRFLOW TROUBLESHOOTING & A2L LOW GWP REFRIGERANT

HANDS-ON TRAINING

WHAT TO EXPECT

RSD is hosting a combination airflow troubleshooting and new A2L Refrigerant class.

We will discuss the unit airflow diagnosis and perform hands-on airflow measurements using industry standard tools used to measure air movement in a ducted system. Technicians will walk away with a better understanding on how to measure static pressure, cfm and knowledge on how to use the tools to take the measurements correctly and use the information in your diagnosis.

The other portion of the class will go over:

- Introduction to low GWP refrigerants
- Properties of R454B, R454B vs. R410A Comparisons
- Proper installation and service guidelines
- Refrigerant Safety
- Installation Best Practices
- Product Transition Schedule and sell-throughs

CLASS DETAILS

DATE: Wednesday, April 2nd 2025

TIME: 8am - 11am
